D-ANMOL IT SOLUTIONS

Computer Basics & MS Office

Build everyday digital confidence with computer fundamentals and essential office productivity

6 Months | Advanced Professional Track

A step-by-step practical learning roadmap with explained tools, applied examples, project milestones and career preparation.

01 WHAT CAN YOU BUILD AFTER THIS COURSE?

- Office Productivity Portfolio: Create a resume, formatted business letter, budget spreadsheet and presentation.
- Small Business Office Management Kit: Build templates for invoices, customer records and monthly expense tracking.

Possible career directions

Office assistant, data-entry trainee, administrative support and junior computer operator. Roles are illustrative and depend on skills, experience and hiring criteria.

Your learning journey

From learning to practical delivery

Learn concepts	Practise skills	Build projects	Show portfolio

02 STEP-BY-STEP COURSE SYLLABUS

Modules are ordered from foundations to application. Each includes what you learn, why it matters and a practical classroom activity.

STEP 01 | Computer & Digital Fundamentals

What you will study:

- Computer parts: understand the concept, practise it with a guided example, and apply it in a relevant task.
- input/output devices: understand the concept, practise it with a guided example, and apply it in a relevant task.
- hardware: understand the concept, practise it with a guided example, and apply it in a relevant task.
- software: understand the concept, practise it with a guided example, and apply it in a relevant task.
- operating systems: understand the concept, practise it with a guided example, and apply it in a relevant task.
- desktop: understand the concept, practise it with a guided example, and apply it in a relevant task.

• taskbar and settings: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Identify system components and complete basic computer operations.

STEP 02 | Windows & File Management

What you will study:

• Files: understand the concept, practise it with a guided example, and apply it in a relevant task.

• folders: understand the concept, practise it with a guided example, and apply it in a relevant task.

• extensions: understand the concept, practise it with a guided example, and apply it in a relevant task.

• copy/move: understand the concept, practise it with a guided example, and apply it in a relevant task.

• search: understand the concept, practise it with a guided example, and apply it in a relevant task.

• recycle bin: understand the concept, practise it with a guided example, and apply it in a relevant task.

• shortcuts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• zip files and storage basics: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Organise a structured folder system and archive files. D-ANMOL IT SOLUTIONS | COURSE CURRICULUM Page 2

STEP 03 | Internet, Email & Online Safety

What you will study:

• Browsers: understand the concept, practise it with a guided example, and apply it in a relevant task.

• search techniques: understand the concept, practise it with a guided example, and apply it in a relevant task.

• downloads: understand the concept, practise it with a guided example, and apply it in a relevant task.

• attachments: understand the concept, practise it with a guided example, and apply it in a relevant task.

• email etiquette: understand the concept, practise it with a guided example, and apply it in a relevant task.

• cloud storage: understand the concept, practise it with a guided example, and apply it in a relevant task.

• passwords: understand the concept, practise it with a guided example, and apply it in a relevant task.

• phishing and privacy: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Compose a professional email with attachments and organise cloud files.

STEP 04 | MS Word Essentials

What you will study:

• Document creation: understand the concept, practise it with a guided example, and apply it in a relevant task.

• formatting: understand the concept, practise it with a guided example, and apply it in a relevant task.

• page layout: understand the concept, practise it with a guided example, and apply it in a relevant task.

• tables: understand the concept, practise it with a guided example, and apply it in a relevant task.

• images: understand the concept, practise it with a guided example, and apply it in a relevant task.

• headers: understand the concept, practise it with a guided example, and apply it in a relevant task.

• footers: understand the concept, practise it with a guided example, and apply it in a relevant task.

• page numbers and printing: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create a polished resume, letter and multi-page report.

STEP 05 | MS Excel Essentials

What you will study:

• Workbook structure: understand the concept, practise it with a guided example, and apply it in a relevant task.

• data entry: understand the concept, practise it with a guided example, and apply it in a relevant task.

• formatting: understand the concept, practise it with a guided example, and apply it in a relevant task.

• formulas: understand the concept, practise it with a guided example, and apply it in a relevant task.

• relative/absolute references: understand the concept, practise it with a guided example, and apply it in a relevant task.

• sorting: understand the concept, practise it with a guided example, and apply it in a relevant task.

• filtering and charts: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create an expense sheet, marksheet and monthly summary.

STEP 06 | Excel Functions & Data Tools

What you will study:

• IF: understand the concept, practise it with a guided example, and apply it in a relevant task.

• SUMIF: understand the concept, practise it with a guided example, and apply it in a relevant task.

• COUNTIF: understand the concept, practise it with a guided example, and apply it in a relevant task.

• lookup concepts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• conditional formatting: understand the concept, practise it with a guided example, and apply it in a relevant task.

• data validation: understand the concept, practise it with a guided example, and apply it in a relevant task.

• tables and PivotTables: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Build a simple performance tracker with summary insights.

STEP 07 | MS PowerPoint

What you will study:

• Themes: understand the concept, practise it with a guided example, and apply it in a relevant task.

• layouts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• typography: understand the concept, practise it with a guided example, and apply it in a relevant task.

• images: understand the concept, practise it with a guided example, and apply it in a relevant task.

• shapes: understand the concept, practise it with a guided example, and apply it in a relevant task.

• charts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• transitions: understand the concept, practise it with a guided example, and apply it in a relevant task.

• animations and presenter view: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Design and deliver a structured presentation.

STEP 08 | Office Productivity & Capstone

What you will study:

• Document workflows: understand the concept, practise it with a guided example, and apply it in a relevant task.

• spreadsheet accuracy: understand the concept, practise it with a guided example, and apply it in a relevant task.

• presentation review: understand the concept, practise it with a guided example, and apply it in a relevant task.

• shortcuts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• printing and practical assessment: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Complete an integrated office assignment using Word, Excel and PowerPoint.

03 TOOLS, LIBRARIES & THEIR USES

This section explains where each tool or library fits in a practical project. Some advanced tools may be introduced as demonstrations in shorter tracks.

Tool / library	What it is used for
MS Word	Create letters, resumes, notices and reports with consistent formatting.
MS Excel	Calculate totals, manage lists, validate records and build charts.
MS PowerPoint	Explain ideas using structured slides and visuals.
Cloud storage	Store, organize and share files with controlled access.

04 PROJECT-BASED LEARNING

Included: 2 project(s). Every project includes planning, implementation, testing and a presentation of results.

LIVE PROJECT 1: Small Business Office Management Kit

What you will build: Build templates for invoices, customer records and monthly expense tracking.

Where tools are used: Word templates, Excel data validation, SUMIF and PivotTables.

Final deliverable: Reusable office kit with sample data.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

LIVE PROJECT 2: School Administration Document Pack

What you will build: Create attendance sheets, parent notices and term performance slides.

Where tools are used: Excel tables, formulas, charts; Word mail-merge concepts; PowerPoint.

Final deliverable: Integrated school office workflow.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

05 TRAINING PLAN & ASSESSMENTS

Suggested duration: 6 Months (approximately 24 weeks). Exact session hours and timetable should be confirmed with the institute.

- Month 1–2 — Foundations, tools and regular practice
- Month 3–4 — Intermediate/advanced topics and first live project
- Month 5 — Second live project, documentation and portfolio
- Month 6 — Interview classes, mock interviews and capstone presentation

Evaluation: practical exercises, module checkpoints, code/document review where applicable, project demonstration and final feedback.

06 INCLUDED INTERVIEW CLASSES

- Resume and portfolio presentation for the selected course.
- Technical and practical interview questions based on course modules.
- Mock interviews, communication practice and feedback.

- Explaining project architecture, decisions, challenges and results.

FREE SUPPORT INCLUDED WITH EVERY COURSE

1 YEAR DOUBT SUPPORT + INTERVIEW PREPARATION — FREE OF COST

- One year of doubt-clearing support related to the enrolled course.
- Interview preparation support at no additional course fee.
- Guidance on explaining course projects and strengthening fundamental concepts.
- Availability, format and scheduling of support sessions to be communicated by the institute.

Important: This brochure presents the requested training offer. The institute should confirm the exact support policy, availability, start date and any applicable conditions before publishing. Interview preparation is not a job or placement guarantee.
