D-ANMOL IT SOLUTIONS

Computer Typing

Improve typing speed, accuracy and confidence through structured keyboard practice.

45 Days | Fast Track

A step-by-step practical learning roadmap with explained tools, applied examples, project milestones and career preparation.

01 WHAT CAN YOU BUILD AFTER THIS COURSE?

- Typing Performance Tracker: Record daily speed, accuracy and common mistakes, then review improvement.
- Exam-Style Typing Practice Kit: Build timed passages and evaluate accuracy under fixed conditions.

Possible career directions

Typing operator, data-entry trainee, office assistant and documentation support. Roles are illustrative and depend on skills, experience and hiring criteria.

Your learning journey

From learning to practical delivery

Learn concepts	**Practise skills**	**Build projects**	**Show portfolio**

02 STEP-BY-STEP COURSE SYLLABUS

Modules are ordered from foundations to application. Each includes what you learn, why it matters and a practical classroom activity.

STEP 01 | Keyboard Familiarisation

What you will study:

- Keyboard layout: understand the concept, practise it with a guided example, and apply it in a relevant task.
- home row: understand the concept, practise it with a guided example, and apply it in a relevant task.
- function keys: understand the concept, practise it with a guided example, and apply it in a relevant task.
- number row: understand the concept, practise it with a guided example, and apply it in a relevant task.
- punctuation and ergonomic posture: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Label key groups and practise correct sitting posture.

STEP 02 | Finger Placement & Home Row

What you will study:

• Correct finger assignment: understand the concept, practise it with a guided example, and apply it in a relevant task.

• home-row drills: understand the concept, practise it with a guided example, and apply it in a relevant task.

• hand positioning and controlled keystrokes: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Complete home-row accuracy drills without looking at the keyboard. D-ANMOL IT SOLUTIONS | COURSE CURRICULUM Page 2

STEP 03 | Top Row, Bottom Row & Reach

What you will study:

• Learn top and bottom row patterns: understand the concept, practise it with a guided example, and apply it in a relevant task.

• shift key: understand the concept, practise it with a guided example, and apply it in a relevant task.

• capitals and reach techniques: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Practise progressive letter combinations and short words.

STEP 04 | Word Building & Common Patterns

What you will study:

• High-frequency words: understand the concept, practise it with a guided example, and apply it in a relevant task.

• syllables: understand the concept, practise it with a guided example, and apply it in a relevant task.

• letter combinations: understand the concept, practise it with a guided example, and apply it in a relevant task.

• spacing and rhythm: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Type word lists while tracking accuracy.

STEP 05 | Sentences, Punctuation & Numbers

What you will study:

• Capitalisation: understand the concept, practise it with a guided example, and apply it in a relevant task.

• punctuation: understand the concept, practise it with a guided example, and apply it in a relevant task.

• symbols: understand the concept, practise it with a guided example, and apply it in a relevant task.

• numeric keypad and mixed text: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Type formatted sentences, dates and numeric passages.

STEP 06 | Paragraphs & Timed Practice

What you will study:

• Paragraph flow: understand the concept, practise it with a guided example, and apply it in a relevant task.

• speed bursts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• sustained typing: understand the concept, practise it with a guided example, and apply it in a relevant task.

• timed passages and error correction: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Complete timed paragraph tests and review errors.

03 TOOLS, LIBRARIES & THEIR USES

This section explains where each tool or library fits in a practical project. Some advanced tools may be introduced as demonstrations in shorter tracks.

Tool / library	What it is used for
Typing tutor	Measure words per minute, accuracy and typing consistency.
MS Word	Prepare realistic passages and formatted typing tests.
Excel	Track errors, daily progress and speed improvements.

04 PROJECT-BASED LEARNING

Included: 1 project(s). Every project includes planning, implementation, testing and a presentation of results.

LIVE PROJECT 1: Typing Performance Tracker

What you will build: Record daily speed, accuracy and common mistakes, then review improvement.

Where tools are used: Typing tutor for tests; Excel for WPM, accuracy and progress charts.

Final deliverable: 30-session typing log and final performance report.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

05 TRAINING PLAN & ASSESSMENTS

Suggested duration: 45 Days (approximately 6 weeks). Exact session hours and timetable should be confirmed with the institute.

- Weeks 1–2 — Fundamentals, guided examples and practice
- Weeks 3–4 — Core modules and practical exercises
- Weeks 5–6 — Live project, testing, review and presentation

Evaluation: practical exercises, module checkpoints, code/document review where applicable, project demonstration and final feedback.

FREE SUPPORT INCLUDED WITH EVERY COURSE

1 YEAR DOUBT SUPPORT + INTERVIEW PREPARATION — FREE OF COST

- One year of doubt-clearing support related to the enrolled course.
- Interview preparation support at no additional course fee.
- Guidance on explaining course projects and strengthening fundamental concepts.
- Availability, format and scheduling of support sessions to be communicated by the institute.

Important: This brochure presents the requested training offer. The institute should confirm the exact support policy, availability, start date and any applicable conditions before publishing. Interview preparation is not a job or placement guarantee.
