D-ANMOL IT SOLUTIONS

Corporate Training

A flexible, role-based learning programme designed around your team's tools and business

3 Months | Foundation Track

A step-by-step practical learning roadmap with explained tools, applied examples, project milestones and career preparation.

01 WHAT CAN YOU BUILD AFTER THIS COURSE?

• Team Productivity Improvement Sprint: Identify one recurring workplace problem and design a documented improvement.

• Department KPI Dashboard: Build a role-specific report using anonymized sample data.

Possible career directions

Role-specific upskilling, internal process champion and team reporting/automation contributor. Roles are illustrative and depend on skills, experience and hiring criteria.

Your learning journey

From learning to practical delivery

Learn concepts	**Practise skills**	**Build projects**	**Show portfolio**

02 STEP-BY-STEP COURSE SYLLABUS

Modules are ordered from foundations to application. Each includes what you learn, why it matters and a practical classroom activity.

STEP 01 | Training Needs & Goal Mapping

What you will study:

• Stakeholder discussion: understand the concept, practise it with a guided example, and apply it in a relevant task.

• role analysis: understand the concept, practise it with a guided example, and apply it in a relevant task.

• skill-gap review: understand the concept, practise it with a guided example, and apply it in a relevant task.

• baseline assessment and success measures: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Create a role-wise training needs summary.

STEP 02 | Digital Workplace Foundations

What you will study:

• File collaboration: understand the concept, practise it with a guided example, and apply it in a relevant task.

• communication: understand the concept, practise it with a guided example, and apply it in a relevant task.

• cloud workspaces: understand the concept, practise it with a guided example, and apply it in a relevant task.

• security awareness and digital etiquette: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Complete a workplace productivity checklist. D-ANMOL IT SOLUTIONS | COURSE CURRICULUM Page 2

STEP 03 | Productivity Tools & Documents

What you will study:

• Word processing: understand the concept, practise it with a guided example, and apply it in a relevant task.

• spreadsheets: understand the concept, practise it with a guided example, and apply it in a relevant task.

• presentations: understand the concept, practise it with a guided example, and apply it in a relevant task.

• templates and collaborative review: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Produce a standard team document pack.

STEP 04 | Data Handling & Reporting

What you will study:

• Data quality: understand the concept, practise it with a guided example, and apply it in a relevant task.

• spreadsheet workflows: understand the concept, practise it with a guided example, and apply it in a relevant task.

• summaries: understand the concept, practise it with a guided example, and apply it in a relevant task.

• charts and reporting standards: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create a department-level report.

STEP 05 | Analytics & Visualisation

What you will study:

• KPIs: understand the concept, practise it with a guided example, and apply it in a relevant task.

• dashboard principles: understand the concept, practise it with a guided example, and apply it in a relevant task.

• Power BI or equivalent reporting tools as selected: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Build a team dashboard prototype.

STEP 06 | AI Literacy & Responsible Use

What you will study:

• Generative AI basics: understand the concept, practise it with a guided example, and apply it in a relevant task.

• prompting: understand the concept, practise it with a guided example, and apply it in a relevant task.

• verification: understand the concept, practise it with a guided example, and apply it in a relevant task.

• privacy: understand the concept, practise it with a guided example, and apply it in a relevant task.

• copyright and approved-use guidelines: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Draft team-specific AI usage guidelines.

STEP 07 | Automation & Process Improvement

What you will study:

• Process mapping: understand the concept, practise it with a guided example, and apply it in a relevant task.

• repetitive-task discovery: understand the concept, practise it with a guided example, and apply it in a relevant task.

• low-code automation and human approval: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Map and prototype one process improvement.

STEP 08 | Role-Specific Technical Track

What you will study:

• A customised module selected from Python: understand the concept, practise it with a guided example, and apply it in a relevant task.

• web development: understand the concept, practise it with a guided example, and apply it in a relevant task.

• marketing: understand the concept, practise it with a guided example, and apply it in a relevant task.

• analytics or office tools: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Complete a practical role-based exercise.

STEP 09 | Collaboration & Quality Practices

What you will study:

• Review workflows: understand the concept, practise it with a guided example, and apply it in a relevant task.

• documentation: understand the concept, practise it with a guided example, and apply it in a relevant task.

• versioning: understand the concept, practise it with a guided example, and apply it in a relevant task.

• peer feedback and quality checks: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Review and improve a shared team deliverable.

STEP 10 | Applied Department Workshop

What you will study:

• Use anonymised or approved business scenarios to solve a real work problem: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create a proof of concept for a department use case.

03 TOOLS, LIBRARIES & THEIR USES

This section explains where each tool or library fits in a practical project. Some advanced tools may be introduced as demonstrations in shorter tracks.

Tool / library	What it is used for
Microsoft 365	Improve document, spreadsheet and collaboration workflows.
Excel / Power BI	Build reports and monitor team KPIs.
AI assistants	Draft and analyze work with privacy safeguards.
n8n / low-code tools	Prototype repetitive task automation.
Role-specific software	Support the department’s actual working tools.

04 PROJECT-BASED LEARNING

Included: 2 project(s). Every project includes planning, implementation, testing and a presentation of results.

NORMAL PROJECT 1: Team Productivity Improvement Sprint

What you will build: Identify one recurring workplace problem and design a documented improvement.

Where tools are used: Process map, Microsoft 365 templates and team feedback.

Final deliverable: Before/after workflow proposal.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

LIVE PROJECT 2: Department KPI Dashboard

What you will build: Build a role-specific report using anonymized sample data.

Where tools are used: Excel, Power Query, Power BI and stakeholder KPI definitions.

Final deliverable: Department dashboard and handover guide.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

05 TRAINING PLAN & ASSESSMENTS

Suggested duration: 3 Months (approximately 12 weeks). Exact session hours and timetable should be confirmed with the institute.

- Month 1 — Foundations and tool practice
- Month 2 — Intermediate topics, assignments and normal project
- Month 3 — Live project and final review

Evaluation: practical exercises, module checkpoints, code/document review where applicable, project demonstration and final feedback.

FREE SUPPORT INCLUDED WITH EVERY COURSE

1 YEAR DOUBT SUPPORT + INTERVIEW PREPARATION — FREE OF COST

- One year of doubt-clearing support related to the enrolled course.
- Interview preparation support at no additional course fee.
- Guidance on explaining course projects and strengthening fundamental concepts.
- Availability, format and scheduling of support sessions to be communicated by the institute.

Important: This brochure presents the requested training offer. The institute should confirm the exact support policy, availability, start date and any applicable conditions before publishing. Interview preparation is not a job or placement guarantee.
