Your learning journey

From learning to practical delivery

Learn concepts	Practise skills	Build projects	Show portfolio

02 STEP-BY-STEP COURSE SYLLABUS

Modules are ordered from foundations to application. Each includes what you learn, why it matters and a practical classroom activity.

STEP 01 | Digital Marketing Foundations

What you will study:

- Channels: understand the concept, practise it with a guided example, and apply it in a relevant task.
- customer journey: understand the concept, practise it with a guided example, and apply it in a relevant task.
- funnels: understand the concept, practise it with a guided example, and apply it in a relevant task.
- objectives: understand the concept, practise it with a guided example, and apply it in a relevant task.
- personas and marketing terminology: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Create a basic digital marketing strategy brief.

STEP 02 | Website & Landing Page Basics

What you will study:

• Website structure: understand the concept, practise it with a guided example, and apply it in a relevant task.

• user experience: understand the concept, practise it with a guided example, and apply it in a relevant task.

• landing pages: understand the concept, practise it with a guided example, and apply it in a relevant task.

• conversion paths and tracking readiness: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Review a landing page and suggest improvements. D-ANMOL IT SOLUTIONS | COURSE CURRICULUM Page 2

STEP 03 | Content Strategy & Copywriting

What you will study:

• Content pillars: understand the concept, practise it with a guided example, and apply it in a relevant task.

• calendars: understand the concept, practise it with a guided example, and apply it in a relevant task.

• hooks: understand the concept, practise it with a guided example, and apply it in a relevant task.

• captions: understand the concept, practise it with a guided example, and apply it in a relevant task.

• CTAs: understand the concept, practise it with a guided example, and apply it in a relevant task.

• brand voice and creative briefs: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: It provides a foundation for later modules and real project implementation.

Hands-on example: Prepare a month-long content calendar.

STEP 04 | Social Media Marketing

What you will study:

• Platform selection: understand the concept, practise it with a guided example, and apply it in a relevant task.

• Instagram: understand the concept, practise it with a guided example, and apply it in a relevant task.

• Facebook: understand the concept, practise it with a guided example, and apply it in a relevant task.

• LinkedIn: understand the concept, practise it with a guided example, and apply it in a relevant task.

• YouTube: understand the concept, practise it with a guided example, and apply it in a relevant task.

• scheduling and community management: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Plan and draft a multi-platform content campaign.

STEP 05 | Canva & Creative Production

What you will study:

• Design principles: understand the concept, practise it with a guided example, and apply it in a relevant task.

• layouts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• typography: understand the concept, practise it with a guided example, and apply it in a relevant task.

• brand consistency and social formats: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create a cohesive set of campaign creatives.

STEP 06 | SEO Fundamentals & Keyword Research

What you will study:

• Search intent: understand the concept, practise it with a guided example, and apply it in a relevant task.

• on-page SEO: understand the concept, practise it with a guided example, and apply it in a relevant task.

• titles: understand the concept, practise it with a guided example, and apply it in a relevant task.

• headings: understand the concept, practise it with a guided example, and apply it in a relevant task.

• internal links and keyword mapping: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Prepare keyword clusters and on-page recommendations.

STEP 07 | Technical & Local SEO

What you will study:

• Indexing: understand the concept, practise it with a guided example, and apply it in a relevant task.

• sitemap: understand the concept, practise it with a guided example, and apply it in a relevant task.

• robots basics: understand the concept, practise it with a guided example, and apply it in a relevant task.

• page speed concepts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• local listings and citations: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Complete a basic SEO health checklist.

STEP 08 | Google Ads Fundamentals

What you will study:

• Account structure: understand the concept, practise it with a guided example, and apply it in a relevant task.

• campaign types: understand the concept, practise it with a guided example, and apply it in a relevant task.

• keywords: understand the concept, practise it with a guided example, and apply it in a relevant task.

• ad groups: understand the concept, practise it with a guided example, and apply it in a relevant task.

• copy and bidding concepts: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Build a search campaign plan without launching spend.

STEP 09 | Meta Ads & Campaign Planning

What you will study:

• Campaign objectives: understand the concept, practise it with a guided example, and apply it in a relevant task.

• audiences: understand the concept, practise it with a guided example, and apply it in a relevant task.

• placements: understand the concept, practise it with a guided example, and apply it in a relevant task.

• creatives: understand the concept, practise it with a guided example, and apply it in a relevant task.

• budget and testing concepts: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Prepare a Meta campaign structure and creative variations.

STEP 10 | Analytics & Conversion Measurement

What you will study:

• GA4 concepts: understand the concept, practise it with a guided example, and apply it in a relevant task.

• events: understand the concept, practise it with a guided example, and apply it in a relevant task.

• conversions: understand the concept, practise it with a guided example, and apply it in a relevant task.

• UTM tags: understand the concept, practise it with a guided example, and apply it in a relevant task.

• Search Console and reporting: understand the concept, practise it with a guided example, and apply it in a relevant task.

Why this matters: You use this skill to solve practical problems, improve accuracy and build reliable outputs.

Hands-on example: Create a campaign measurement plan.

03 TOOLS, LIBRARIES & THEIR USES

This section explains where each tool or library fits in a practical project. Some advanced tools may be introduced as demonstrations in shorter tracks.

Tool / library	What it is used for
Google Search Console	Inspect search performance and indexing.
Google Analytics 4	Measure events and user journeys.

Tool / library	What it is used for
Google Ads	Plan and manage paid search campaigns.
Meta Business Suite	Organize social content and advertising workflows.
Canva	Create branded campaign graphics.
Excel	Track KPIs, spend assumptions and reporting.

04 PROJECT-BASED LEARNING

Included: 2 project(s). Every project includes planning, implementation, testing and a presentation of results.

NORMAL PROJECT 1: Local Brand Digital Campaign

What you will build: Plan content and SEO improvements for a sample local business.

Where tools are used: Keyword research, Canva creatives, Meta scheduling and GA4 measurement plan.

Final deliverable: 30-day content calendar and campaign brief.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

LIVE PROJECT 2: SEO Growth Audit

What you will build: Review pages, search intent, titles, internal links and indexing basics.

Where tools are used: Search Console, keyword tools, spreadsheet audit.

Final deliverable: Prioritized SEO audit and action plan.

Project workflow

Input / brief	Build & test	Review results	Present output

Live project means an applied, end-to-end project based on a realistic business scenario or suitable dataset; access to an external client or production deployment is not implied.

05 TRAINING PLAN & ASSESSMENTS

Suggested duration: 3 Months (approximately 12 weeks). Exact session hours and timetable should be confirmed with the institute.

- Month 1 — Foundations and tool practice
- Month 2 — Intermediate topics, assignments and normal project

- Month 3 — Live project and final review

Evaluation: practical exercises, module checkpoints, code/document review where applicable, project demonstration and final feedback.

FREE SUPPORT INCLUDED WITH EVERY COURSE

1 YEAR DOUBT SUPPORT + INTERVIEW PREPARATION — FREE OF COST

- One year of doubt-clearing support related to the enrolled course.
- Interview preparation support at no additional course fee.
- Guidance on explaining course projects and strengthening fundamental concepts.
- Availability, format and scheduling of support sessions to be communicated by the institute.

Important: This brochure presents the requested training offer. The institute should confirm the exact support policy, availability, start date and any applicable conditions before publishing. Interview preparation is not a job or placement guarantee.
